

# POWERPROV IMPROV WORKSHOP

## POWERPROV IMPROV WORKSHOP

When most people think of improvisation, they think of comedy, but there's more to improv than making stuff up and having a laugh.

Improv is all about learning to "React, Adapt & Communicate," as well as stay focused, and operate at the top of your intelligence, especially when the unexpected occurs.

To do this well, we need to get out of our heads and get into the moment. And learn to trust ourselves and each other.

This will be a highly interactive, super fun, and incredibly valuable session with a unique program design that will endow you with new tools for communication, collaboration, and innovation - without having to perform or be funny.

Come transcend the thinking process and learn to knock on the door of instinct and intuition.

And have a lot of fun.

## WHEN AND WHERE
